

## Why a Workman Front Load Tricycle is a Good Choice:

Tricycles are especially well suited for cargo transport inside factories as well as in Urban Outdoor environments

- The **STABILITY** of three wheels allows you to get safely navigate the Streetscape, going as slow as you want or as fast as is safe..
- Workman Front Load trikes are extremely intuitive to ride. After a few laps around town, riders get a great feel for the handling characteristics
- Tricycles don't need to be balanced or pushed hard at takeoff to stay up, so you can move a heavy load easier by starting slow and adding speed one pedal stroke at a time.
- Workman Front Load Tricycles do not require rider balance skills as a bicycle would. You can simply sit on the trike either while standing still or while in motion, knowing you do not need to lean into turns or feel out of control.
- Unlike a bicycle, on a tricycle you can sit comfortably while stopped so no need to jump on and off.
- Tricycles with dual front wheels are simpler and easier to maintain than any other design. The drive system is that of a bicycle with a coaster brake (back pedal to stop)
- You can see your cargo which is in front of you and it's easy to navigate as the widest point of the tricycle is in front of you, so judging your route is very easy.
- Workman Front load trikes have a track history of over 80 years, including the first Good Humor  Ice cream tricycles that we created in the late 1930s

### How does it turn?

The answer is its simple. The Workman Front Load tricycles have a steer True Spindle axle, so the entire front picots and is controlled by a handlebar that you push right or left to control steering. The Workman Steer True Pivot bearing system we use makes it effortless to turn.

## **Is it easy to assemble?**

The tricycle is shipped in two parts, easily bolted together with common tools. Anyone with some bicycle work experience or is just generally handy can assemble their tricycle themselves. No special tools are required.

## **Are Worksman Cycles More Durable Than Other Brands?**

YES!!!!!!! A Tricycle is only as durable as its components. The Worksman Front Loader Frame is unequaled as it features a lugged frame with a malleable Steering lug, 14G main frame tubing and 5/8" rear stays. Super durable, nearly unbreakable. The front axle is a 1" solid steel design with Steer True pivot lug making them not only incredibly durable but so easy to steer. Our Wheels are unlike any other brand as the rims are simply far thicker than bicycle wheels others use. Worksman Wheels are frankly quite legendary for their durability. Spokes are 11g (.120), the chain is 50% thicker than regular bicycle chain as is the front sprocket. The Platforms or Cabinets are mounted to the frames on automotive style leaf springs, offering durability and load suspension.

## **Freedom to Choose:**

As shown on our website, you can configure our Front Load Tricycles with upgrades such as custom colors, custom gearing, tire upgrades (even airless tires for settings where flat tires are a potential issue), Front Mag exclusive Welded wheels and more! Have it your way!

## **Why Worksman Cycles is the Right Choice:**

### **CONFIDENCE**

There are many choices on the market today. Most all are imported cycles from fairly new companies that slap their labels on the cycle they source (mostly from China) and market aggressively on social media. But where will those companies be when you require spare parts years from now. Only Worksman Cycles can claim over 100 years in business and is America's Oldest Bicycle Manufacturer and we've supported the cycles we've sold for all of these years. Worksman has a state of the art factory that is close to 3 Acres under roof in Conway SC (we relocated from our NYC factory in 2017). We weld, fabricate Powder coat, build wheels, assemble and pack in our own factory. Work is performed by proud, hardworking USA factory Team Members, dedicated to our customer's satisfaction. (We do still have a facility in Queens NYC as well). The bottom line is that when you deal with Worksman Cycles, you are buying from a reliable USA based company with an unsurpassed history, and cycles made by American workers. And customers can call us during normal business hours and expect a live customer service representative to assist, If you buy from most other companiesí .all we can say is buyer bewareí .there are a lot of fly by night companies selling bikes these days. Worksman Cyclesí continuous USA manufacturing and the same family ownership Since 1898.
