Genuine Worksmans Parts & Accessories

The 14 Critical Things to Insist On When Choosing an Industrial Cycle

If an industrial cycle does not have all 14 then you can be sure:

- It is not a Genuine Made-in-America* Workman Cycle
- It was not designed from the ground-up to be an Industrial Cycle

Workman Cycles are delivered 90% assembled!

11 ALL THE OPTIONS YOU WANT!

Optional steel basket

Lockable steel cabinets

Airless & Kevlar tire options

Safety & comfort options Speed & Gearing options

Broad choice of colors including custom colors and graphics

12 ALL THE PARTS YOU NEED!

An industrial cycle needs to be up and running day-in, day-out. So waiting for parts for cycles made overseas can put a serious dent in your productivity. Workman Cycles maintains the largest parts inventory in the industry with over 100,000 parts and accessories ready to ship.

13 MADE-IN-AMERICA QUALITY & VALUE

Workman Cycles have been Made in America since 1898. Each weld, paint job, wheel and finished cycle is built in our New York City factory by American workers. It cost a lot more to build them this way, so why don't Workman Cycles cost more to buy than inferior imported cycles? Because Workman believes in value and fair pricing.

14 A COMPANY YOU CAN TRUST!

An Industrial Cycle is only as good as the company that stands behind it! Workman has been the world leader for over 115 years. In that time, we have seen many competitors come and go leaving corporations with inferior cycles and without spare parts available. Demand the best. Demand Workman - a company as reliable as our products!
